

Pollux's Star Finder

Print your star finder two-sided, on card stock.

- Cut out the star map outside the circle.
- Cut out the oval inside the map to make a small window.
- Cut the holder along the solid lines.
- Fold the holder along the dotted lines.
- Slide the star map into the holder to see the stars through the oval window.

Pollux's Star Finder

1. Turn the round section to match the date and time of your observation.
2. Place the star finder in front of you so that the cardinal points of the star finder correspond with those of your location (North, South, East, West).
3. Try to identify the different constellations in the sky.
